

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

PREFACE

In the preparation of these lessons, the author has kept in view the necessity for simplicity of statement and for the avoidance of unnecessary details. The purpose has been to furnish drill on the forms and constructions of most frequent occurrence, leaving the more difficult syntactical relations and the forms less frequently employed for a later point in the course. A few topics included in the lessons near the end of the book have been given place in order to meet the needs of teachers who prefer a more complete presentation of Latin grammar in the first year. These topics may, however, be omitted and the work of the lessons made to consist of the translation exercises and drill on the essential constructions and forms previously given.

Instead of the usual arrangement of lessons which must be divided into two or three assignments, the plan has been adopted of providing short lessons which can usually be covered in single recitations. Naturally, no such plan can be made to correspond absolutely to the needs of every class, and occasionally a teacher may find it necessary to omit or to leave for later review, part of the exercises of a lesson. But the presentation of forms and syntax in small units will, it is hoped, tend to prevent confusion in the mind of the pupil and to aid the teacher in planning the work of the class.

The number of new words in each lesson has been kept as nearly uniform as possible and review lessons have been provided for special drill on vocabulary. These review lessons, however, with the exception of the first and second, are not an essential part of the plan of the book and may be omitted by teachers who prefer to arrange reviews in a different way. In connection with these lessons, lists of

English derivatives have been given which may serve to relate the work in Latin more closely to the pupil's study of English, and to make clear the great importance of the Latin element in the English language. The vocabulary is for the greater part based on Caesar.

The reading lessons are planned to make the translation of Caesar easier, by giving in simple Latin the story of the first two books of the Gallic war, and by the frequent use of phrases and constructions from Caesar. The pupil who studies Latin but one year will at least have the opportunity to learn something of Caesar's narrative which may contribute to his interest in ancient history.

The selections from Eutropius are based on the text of Ruehl, with some changes and omissions. Boys and girls in the high school usually read Eutropius with interest, and since to many the tales of early Rome are unfamiliar, a good introduction to Roman history is furnished by this material.

The recommendations of the Joint Committee on Grammatical Nomenclature have been followed, with a few exceptions. The name "past" instead of "past descriptive" has been used in the indicative, and a different term from that suggested by the Committee has been employed to designate conditional sentences with the present and past tenses of the indicative. Some of the classifications recommended by the Committee have been omitted as unnecessary for first year work.

Acknowledgment is made of the many helpful suggestions which were received from Professor Frederick W. Sanford of the University of Nebraska, Professor Charles Knapp of Barnard College, Miss Mildred Dean of the Central High School of Washington, D. C., Professor Arthur Tappan Walker of the University of Kansas, and Professor Rollin H. Tanner of Illinois College, who read the manuscript. Professor Edward Capps of Princeton University, editor of the Lake Classical Series, has also given the book the benefit

of his scholarly judgment on many points. Some features which have been most heartily commended by those to whom the manuscript has been submitted are due to the suggestions of the late Professor H. W. Johnston of the University of Indiana, to whom the plan of the lessons was submitted shortly before his death.

THE VALUE OF LATIN

A very large proportion of the words of the English language is derived from Latin. In some instances words have been taken directly, without change of form. For example, *terminus*, *stimulus*, *veto*, and *affidavit*, are Latin words in the form in which they were used by the Romans. Other words first became a part of the French language and after being modified by the pronunciation of that language were taken into English in this changed form. Such are *humble*, *count*, *blame*, and *sure*. The numerous English adjectives ending in *-ent* and *-ant*, such as *patient*, *intelligent*, *independent*, and *defiant*, are derived from Latin participles either directly or through the French. As an illustration of how large this element is in English, nearly three-fourths of the words in the Preamble to the Constitution of the United States (with the exception of prepositions and articles) are of Latin origin.

The study of Latin is, therefore, to a large extent, the study of the history of our own language. But it is more than merely a study of its history. One who has become familiar with the derivation of the words which he uses is likely to speak and write with greater clearness and accuracy. For this reason the best schools which afford training for those who wish to become newspaper writers advise or require the study of Latin as a preparation. For the same reason, law schools require that a student shall have some knowledge of Latin, and prominent lawyers have said that no other training can give the command of language which is necessary for the largest success in the legal profession. Schools of engineering advise or require Latin because the Latin student usually has the ability to state a plan of work

or describe what is to be done with greater clearness than one who has not had the training afforded by Latin.

For business life the study of Latin is valuable in that it gives one a larger English vocabulary and through the experience of translation affords training in the careful choice of words. Even a brief course, of two or three years will give much help in these respects. One who has learned to look carefully at words is more likely to avoid errors in spelling and in the structure of sentences. Inaccuracy in the use of language may be the cause of failure in many situations in the business world. In proportion as one gains positions of greater importance, the ability to speak and write clearly and correctly becomes more valuable. The opportunities for success for one who lacks this ability are rapidly becoming less.

Another reason why the study of Latin is of importance to the English-speaking person is that his own literature is made clearer thereby. The greatest works of English literature have been written by men who knew Latin, and they contain innumerable passages which cannot be understood without a knowledge of Latin. This does not mean simply Latin quotations, but references and forms of expression in English. And this is true not merely of the writers of an early period, but of some of the most modern. Many English poems have as their titles famous Latin phrases which one must understand in order to appreciate the poems themselves.

The modern languages which have been developed from Latin are very important and widely spoken. Those of Italy, France, Spain, Portugal, and Roumania are modern forms of Latin. And since the languages spoken in the greater part of South America, and Mexico, and in parts of the southwestern states of our own country and of Canada belong to this group, they are of very direct concern to us. Further, one who wishes to become familiar with the great literatures of the world or to be able to read important scientific books must

MAP SHOWING THE INFLUENCE OF LATIN ON THE LANGUAGES OF MODERN EUROPE

Heavy shading indicates languages directly derived from Latin

know at least one of these languages. If he knows Latin he has the foundation of all of them and can learn any one of them with much less effort because of that knowledge.

In the Latin language there is also a great literature which one will appreciate better if he reads it in the original form. The works of the Roman poets and historians have had a powerful influence on the literature of modern nations. They are often quoted today, and parts of them have been imitated many times. In reading them one finds the source of a great number of the mythological stories which have been retold in so many forms in later literature. These stories become more vivid and real as they are read in the language in which they were originally written.

In these ways and in others, the study of Latin is closely connected with the life of the modern world, and it cannot well be disregarded by any one who wishes to become in the best sense efficient and intelligent.

INTRODUCTORY LESSON

THE ALPHABET

1. The Latin alphabet is the same as the English, except that the Latin has no *j* or *w*.

VOWELS AND CONSONANTS

2. The vowels, as in English, are *a*, *e*, *i*, *o*, *u*, and *y*. The other letters are consonants. The letter *i* is usually a consonant when it stands at the beginning of a word and is followed by a vowel, or when it stands between vowels within a word.

SOUNDS OF THE LETTERS

3. The vowels in Latin are either long or short. In this book long vowels are indicated by a mark placed above them. A vowel which is unmarked is short. The vowel sounds are indicated in the following table:

\bar{a} = <i>a</i> in "father"	a = <i>a</i> in "comma" ¹
\bar{e} = <i>e</i> in "fade"	e = <i>e</i> in "net"
\bar{i} = <i>i</i> in "machine"	i = <i>i</i> in "this"
\bar{o} = <i>o</i> in "holy"	o = <i>o</i> in "domain"
\bar{u} = <i>u</i> in "rude"	u = <i>u</i> in "full"

y is seldom used. Its sound is the same as that of *u* in the French language or *ü* in German.

¹ Like \bar{a} , but pronounced more quickly.

4. The consonants have in general the same sounds as in English. The following exceptions are to be noted:

c and **ch** have the sound of *k*.

g has only one sound, that heard in *go*.

i as a consonant is equivalent to *y* in *yes*.

s has only the sound heard in *say*.

t always has the sound heard in *top*. It does not combine with *i* to give the sound of *sh* as in *nation*.

v has the sound of *w*.

x has only the sound of *ks*, as in *exercise*.

bs and **bt** are equivalent to *ps* and *pt*.

ph and **th** are nearly equivalent to *p* and *t*.

DIPHTHONGS

5. A diphthong is a combination of two vowels in one syllable. The diphthongs are **ae**, **au**, **ei**, **eu**, **oe**, and **ui**. Their sounds are as follows:

ae = *ai* in "aisle"

eu = *eu* in "feud"

au = *ou* in "out"

oe = *oi* in "boil"

ei = *ei* in "vein"

ui = almost *ui* in "ruin"

SYLLABLES

6. (1) A syllable must contain a vowel or a diphthong, and may contain also one or more consonants.

(2) A consonant between two vowels is taken with the vowel which follows it: **pō-nō**, **ha-be-ō**.

(3) Two consonants between two vowels are divided, one going with the vowel which precedes and one with the vowel which follows. But if the second of two consonants is *l* or *r*, and if the combination can be pronounced at the beginning of a word, as **bl**, **br**, etc., the two are taken with the vowel which follows, like a single consonant:² **man-dā-re**, **car-dō**; but **fe-bris**, **ā-cris**.

¹ The *u* is shorter than in the English word, and the vowels are more closely blended.

² In the division of a compound verb into syllables in writing or printing, the prepositional element is separated from the simple verb.

LENGTH OF SYLLABLES

7. (1) A syllable is long if it contains a long vowel or a diphthong: **dō-num, cau-tus.**

(2) A syllable is long if its vowel is followed by two consonants, except when the first of these consonants is a mute, and the second is **l** or **r**. The mutes are **b, p, c, k, q, g, d, t**, and the combinations **ph, th, and ch**: **con-dō, mit-tō.**

(3) All other syllables are short: **me-mor, a-grī.**

a. **x** and **z** have the value of two consonants because they represent a combination of sounds. A syllable is long if its vowel is followed by either of these double consonants.

ACCENT

8. (1) In a word of two syllables the accent falls on the first syllable.

(2) In a word of more than two syllables the accent falls on the syllable before the last, if it is long, otherwise on the second syllable from the last: **lū'men, au-dī're, con-ten'tus, me'mi-nī.**

(3) The syllable before the last is called the *penult*, the second from the last is called the *antepenult*.

LESSON I

NOUN INFLECTION: THE ARTICLE: POSITION OF VERB

THE USE OF CASE FORMS IN ENGLISH

9. In English, one form of the pronoun is used as the subject of the sentence, a different form as the object of a verb or of a preposition, and a third form to express possession.

He walks (subject).

We see *him* (object).

His book is new (possessive).

CASE FORMS OF LATIN NOUNS

10. In Latin, nouns as well as pronouns have different forms to show how they are used in sentences.

Puella (subject) *ambulat*, *the girl walks*.

Puellam (object) *videmus*, *we see the girl*.

Liber puellae (possessive), *the girl's book*.

NAMES OF CASES

11. The subject case is called the Nominative, the object case is called the Accusative, and the case of the possessor is called the Genitive.

NOM. puella (subject).

GEN. puellae (possessive).

ACC. puellam (object).

TRANSLATION OF THE GENITIVE

12. The genitive is sometimes translated by the English possessive, as in the example above, and sometimes by *of* and the noun. Puellae may be translated *the girl's* or *of the girl*.

THE ARTICLE

13. The Latin has no article. With the English translation of a Latin noun, *a*, *an*, or *the* is generally supplied as the sense requires. Puella means *the girl* or *a girl* according to the meaning of the sentence in which it stands.

POSITION OF THE VERB

14. The verb of a Latin sentence, unless it is especially emphasized, usually stands at the end of the sentence.¹

15. VOCABULARY

<i>fēmina</i> , woman	<i>amat</i> , loves
<i>filia</i> , daughter	<i>dat</i> , gives
<i>puella</i> , girl	<i>laudat</i> , praises
<i>rosa</i> , rose	<i>vocat</i> , calls

EXERCISES

- 16.
1. *Fēmina puellam vocat.*
 2. *Puella fēminam vocat.*
 3. *Filia rosam dat.*
 4. *Fēmina rosam puellae laudat.*
 5. *Puella filiam fēminae amat.*
 6. *Filia fēminae rosam laudat.*
- 17.
1. The woman loves the girl.
 2. The girl loves the woman.
 3. The woman praises the girl.
 4. The woman's daughter gives a rose.
 5. The girl praises the woman's rose.

SUGGESTED DRILL

(1) Divide the words of the vocabulary into syllables and indicate the accent of each word. (2) Give the genitive and the accusative of each noun in the vocabulary. (3) In the following sentences point out the subjects: (a) The boy has a gun. (b) We missed the first train. (c) You did not see us yesterday. (d) The engine of the aeroplane is small. (e) The boy's gun is not loaded. (f) The friends of this girl sent presents. (4) In the sentences of (3) point out the objects, and also the words or phrases which express possession. (5) Name the case in which each noun or pronoun in these sentences would stand if translated into Latin.

¹ The forms of the verb meaning *to be*, when equivalent to the English *there is*, or *there are*, usually stand first in the clause.

LESSON II

ADJECTIVES: PREDICATE ADJECTIVES AND NOUNS

CASE FORMS OF ADJECTIVES

18. Adjectives as well as nouns have different case forms in Latin. An adjective agrees in case with the noun to which it belongs.

NOM.	<u>puella bona</u> , a good girl.
GEN.	<u>puellae bonae</u> , of a good girl.
ACC.	<u>puellam bonam</u> , a good girl.

POSITION OF ADJECTIVES

PREDICATE ADJECTIVES

20. An adjective which is connected with a noun or pronoun by some form of the verb meaning *to be* is called a Predicate Adjective.

A predicate adjective agrees with the subject of its clause.

Fēmina benigna est, the woman is kind.

PREDICATE NOUNS

21. A noun which is connected with the subject by some form of the verb meaning *to be* is called a Predicate Noun. A predicate noun stands in the same case as the subject.

LESSON III

INDIRECT OBJECT: DATIVE WITH ADJECTIVES: POSITION OF GENITIVE AND DATIVE

THE INDIRECT OBJECT

25. The word denoting the person to whom something is given or said or shown is called the Indirect Object.

He told the *boy* an interesting story.

The girl gave her *sister* a picture.

THE DATIVE AS INDIRECT OBJECT

26. In Latin, the case of the indirect object is called the Dative. Nouns which end in *-a* in the nominative have the same form for the dative as for the genitive in the singular.

Fēmina puellae rosam dat, the woman gives the girl a rose.

a. In English the indirect object is often expressed by "to" and the noun.

The woman gives a rose to the girl.

In Latin the phrase *to the girl* is expressed by the one word, *puellae*.

THE DATIVE WITH ADJECTIVES

27. In English, many adjectives, such as those meaning *kind, friendly, pleasing, useful, near*, are modified by a phrase consisting of the preposition *to* and a noun or pronoun.

Every one is kind to me.

In Latin, such adjectives are modified by the dative.

Puellae benigna, kind to the girl.

POSITION OF THE GENITIVE AND THE DATIVE

28. (1) A noun in the genitive case, when not emphasized, commonly stands after the word to which it belongs.

(2) A noun in the dative case, when not emphasized, commonly stands before the word to which it belongs.

VERB ENDINGS OF THE THIRD PERSON

29. Verbs ending in -t are in the third person, singular number. The third person plural ends in -nt.

SING. laudat, *praises*.

PLU. laudant, *praise*.

30.

 2. The girl and the woman call the sailor.
 3. The large rose is pleasing to you.

(3) Name the case which may be used after adjectives meaning *friendly*, *unfriendly*, *pleasing*, *opposed*, *injurious*. (4) Point out the indirect objects and also the direct objects in the following sentences: (a) They told us the reason for this. (b) No one gave the tramp money. (c) Who gave your brother this knife? (d) He said this to his father.

LESSON IV

THE ABLATIVE: THE VOCATIVE: THE FIRST DECLENSION

THE ABLATIVE CASE

33. The case used in Latin to express relations which are indicated in English by the prepositions *from*, *in*, and *with* is called the Ablative. There are additional uses of this case which have been developed from these. Latin prepositions are sometimes used with the ablative.

ex silvā, *from the forest.*

in silvā, *in the forest.*

cum nautā, *with the sailor.*

a. The form of the ablative singular is to be distinguished from that of the nominative singular by the final long *a* in such nouns as those given above.

NOM. **silva.**

ABL. **silvā.**

THE VOCATIVE CASE

34. The case used in Latin to name the person directly addressed is called the Vocative. In most nouns the vocative singular is identical in form with the nominative singular. The vocative plural is always identical with the nominative plural.

Filia tua, Cornēlia, pulchra est, *Cornelia, your daughter is beautiful.*

POSITION OF THE VOCATIVE

35. In Latin, the vocative regularly stands after one or more words in the sentence, as in the example above. Its English equivalent usually stands either at the beginning or at the end of the sentence.

THE FIRST DECLENSION

36. The nouns which have been given thus far belong to what is called the First Declension. They are declined in full through the singular and plural according to the following model:¹

rosa, rose

	SINGULAR		TERMINATIONS
NOM.	<i>rosa,</i>	<i>a rose</i> (subject or predicate)	-a
GEN.	<i>rosae,</i>	<i>of a rose</i>	-ae
DAT.	<i>rosae,</i>	<i>to or for a rose</i>	-ae
ACC.	<i>rosam,</i>	<i>a rose</i> (object)	-am
ABL.	<i>rosā,</i>	<i>from, in, with a rose</i>	-ā
	PLURAL		
NOM.	<i>rosae,</i>	<i>roses</i> (subject or predicate)	-ae
GEN.	<i>rosārum,</i>	<i>of roses</i>	-ārum
DAT.	<i>rosīs,</i>	<i>to or for roses</i>	-īs
ACC.	<i>rosās,</i>	<i>roses</i> (object)	-ās
ABL.	<i>rosīs,</i>	<i>from, in, with roses</i>	-īs

a. The genitive singular ending, **-ae**, printed after a word in the vocabulary shows that the word belongs to the first declension.

IDENTICAL FORMS

37. The form *rosae* may be a genitive singular, a dative singular, a nominative plural, or a vocative plural. The meaning of the rest of the sentence will usually make it possible to determine what is the case of a doubtful form.

THE BASE

38. The part of a noun to which the terminations are added and which is not changed in declension, is called the Base. The base of *rosa* is *ros-*. The base of a noun is found by dropping the ending of the genitive singular.

¹ The noun *fīlla* has the irregular form *fīllābus* in the dative and ablative plural.

39.

¹ Before vowels and *h*, *ex* is used, before most consonants, *e*.

LESSON V

PRESENT INDICATIVE: AGREEMENT OF VERB:
THE INFINITIVE: FIRST CONJUGATION

THE THREE FORMS OF THE ENGLISH VERB

42. The English verb has three forms for the present tense; *walks*, *does walk*, and *is walking* are all present. In Latin, there is only one form for this tense. The form **ambulat** is translated *walks*, or *is walking*, or *does walk*, as the sense requires. **Nōn ambulat** is translated *does not walk*, or *is not walking*. **Ubi puella habitat** is translated *Where does the girl live?* or *Where is the girl living?*

PERSONAL ENDINGS OF THE VERB

43. The form **portō** is translated *I carry* (*am carrying, do carry*). The subject *I* is indicated by the ending **-ō**, and a pronoun is not expressed unless the subject is emphasized, or contrasted with another word.

In the form **portat**, the ending **-t** shows that the verb is third person, singular number. If no subject is expressed in the Latin, a pronoun of the third person, *he*, *she*, or *it*, is regularly to be supplied in translation. Thus **est** may be translated *he is*, or *she is*, or *it is*.

The other personal pronouns when not emphatic are likewise indicated as subjects by verb endings.

AGREEMENT OF THE VERB

44. The verb agrees with its subject in person and number.

THE INFINITIVE

45. The present active infinitive of **portō** is **portāre**, *to carry*. All verbs given thus far, except the verb meaning *to be*, form the present active infinitive with the termination **-āre**: **laudāre**, *to praise*; **amāre**, *to love*.

a. The infinitive **dare**, *to give*, is slightly irregular, in that the **a** is short.

THE FIRST CONJUGATION

46. Verbs which have the infinitive termination **-āre** form what is called the First Conjugation.

The forms of the first conjugation in the present tense, indicative mood, active voice, are as follows:

SINGULAR		PERSONAL ENDINGS
1. portō,	<i>I carry, (am carrying, do carry)</i>	-ō (<i>I</i>)
2. portās,	<i>you (singular) carry, etc.</i>	-s (<i>you</i>) ¹
3. portat,	<i>he, she, it carries, etc.</i>	-t (<i>he, she, it</i>)

PLURAL		
1. portāmus,	<i>we carry, etc.</i>	-mus (<i>we</i>)
2. portātis,	<i>you (plural) carry, etc.</i>	-tis (<i>you</i>)
3. portant,	<i>they carry, etc.</i>	-nt (<i>they</i>)

a. In the vocabulary, either the infinitive or its termination is printed after the first form given, to indicate the conjugation.

b. The main body of the verb, ending in the characteristic vowel, is called the Present Stem. The present stem of **portāre** is **portā-**. The present tense of the indicative mood is formed by uniting personal endings to the present stem. In the first person singular of the first conjugation the characteristic **ā** disappears. Before the endings **-t** and **-nt** it becomes short **a**.

47. VOCABULARY

Hibernia, -ae,	Ireland	mihi, to me (<i>dat.</i>)
patria, -ae,	native country	nōn, <i>adv.</i> , not

¹ In English, *you carry* may be either singular or plural. In Latin, the distinction between the singular and the plural of the verb in the second person is always indicated.

EXERCISES

48. 1. Nōn in Hiberniā habitō. 2. Britannia et Hibernia sunt insulae. 3. Britannia nōn patria mea est. 4. In viā cum nautā ambulāmus. 5. In insulā habitō. 6. Puella mihi rosam dat. 7. Tibi rosās dō. 8. Statuam pulchram laudātis. 9. Patriam meam amō et laudō. 10. Filia agricolae cum fēminā in viā ambulat.

**GENDER OF NOUNS: SECOND DECLENSION, -UM NOUNS:

a. The present infinitive is **esse**, *to be*.

THE EXPLETIVE "THERE"

71. The English word *there* is often used as an expletive; that is, it serves merely to introduce the sentence and has no adverbial force (no idea of place). In this use it has no equivalent in Latin, and is to be supplied in translation when the sense requires; *est periculum* may be translated, *there is danger*.

LESSON IX

FIRST AND SECOND DECLENSION ADJECTIVES: IRREGULAR
GENITIVE AND VOCATIVE FORMS

ADJECTIVES OF THE FIRST AND SECOND DECLENSIONS

75. There are many adjectives which have their masculine and neuter forms in the second declension and their feminine forms in the first declension. Those having the masculine ending in **-us** are declined as follows:

bonus, -a, -um, good

	SINGULAR		
	<i>Masc.</i>	<i>Fem.</i>	<i>Neut.</i>

GEN.	bonōrum	bonārum	bonōrum
DAT.	bonīs	bonīs	bonīs
ACC.	bonōs	bonās	bona
ABL.	bonīs	bonīs	bonīs

The adjectives **benignus, grātus, and magnus**, the feminine forms of which have been given, are declined like **bonus**.

IRREGULAR GENITIVES OF THE SECOND DECLENSION

76. Nouns ending in **-ium** or **-ius** regularly form the genitive singular by replacing **-ium** or **-ius** by **-i**: **beneficium**, gen., **benefici**; **filius**, gen., **fili**. These shortened genitive forms are accented on the syllable before the last: **benefi'ci**. Adjectives are not thus contracted.

IRREGULAR VOCATIVE FORMS

77. Proper nouns ending in **-ius** and also the common noun **filius** regularly form the vocative singular in the same manner as the genitive singular; hence **fili** may be either genitive singular or vocative singular.

FIRST AND SECOND DECLENSION ADJECTIVES (Continued):
POSSESSIVE ADJECTIVES

ADJECTIVES IN -ER OF THE FIRST AND SECOND DECLENSIONS

81. Some adjectives of the first and second declensions have the masculine singular nominative ending in **-er**. Of these, some are declined by adding the case endings to the nominative singular of the masculine. In others the **e** before **r** appears only in the nominative and vocative singular of the masculine.

The possessive words **meus**, *my* or *mine*, **tuus**, *your* (referring to one person), **noster**, *our*, and **vester**, *your* (referring to more than one person) are adjectives, and are declined throughout. DEMONSTRATIVES: DECLENSION OF *HIC*: POSITION OF DEMONSTRATIVES**DEMONSTRATIVE ADJECTIVES AND PRONOUNS**

89. The demonstratives in Latin, like their most general English equivalents, *this* and *that*, are used to point out objects without describing them.

DECLENSION OF *HIC*

90. The forms of the demonstrative *hic*, *this*, pointing out an object near at hand, are as follows:

	SINGULAR			PLURAL		
	<i>Masc.</i>	<i>Fem.</i>	<i>Neut.</i>	<i>Masc.</i>	<i>Fem.</i>	<i>Neut.</i>

91. The demonstratives may be used as adjectives or as pronouns. As adjectives they agree in gender, number, and case with the nouns to which they belong. As pronouns they agree in gender and number with the nouns to which they refer, but their case is determined by their use in the clauses in which they stand.

POSITION OF DEMONSTRATIVES

92. Demonstrative adjectives, like words which express quantity (78, a), unless especially emphasized, precede the nouns to which they belong: *hic vir*, *this man*. This is also true of words which denote number.

THE FOUR CONJUGATIONS: PRESENT INDICATIVE OF THE
SECOND CONJUGATION: ABLATIVE OF PLACE

THE FOUR CONJUGATIONS

108. There are four conjugations of verbs in Latin. They are distinguished by the final vowel of the present stem. The termination of the present active infinitive shows to which conjugation a verb belongs.

	<i>Infinitive</i>	<i>Termination</i>	<i>Characteristic Vowel</i>
I.	portāre	-āre	ā
II.	monēre	-ēre	ē
III.	dūcere	-ere	e
IV.	audire	-ire	i

PRESENT INDICATIVE OF THE SECOND CONJUGATION

109. The characteristic vowel of the second conjugation, *ē*, appears in all the forms of the present tense. It becomes short before another vowel and before the personal endings *-t*, *-nt*, and *-ntur*. (The same change of quantity takes place in the other conjugations when a long vowel is followed by another vowel or by the endings given above.)

ROMAN FESTIVAL PROCESSION

LESSON XV

PAST (IMPERFECT) INDICATIVE ACTIVE, FIRST AND SECOND CONJUGATIONS: *HIC* AND *ILLE* AS CORRELATIVES**THE PAST (IMPERFECT)¹ INDICATIVE ACTIVE**

114. The past tense of the indicative mood represents an act as going on or a situation as existing at a past time.

Vocābam, *I was calling.*

It is sometimes translated by the simple form of the past tense, *I called.*

ENTRANCE TO A ROMAN FORTIFIED CAMP

¹ While the name "past descriptive," indicates the use of this tense very satisfactorily, it has seemed best to employ merely the name "past" in the paradigms and exercises of this book. Teachers who prefer to use the more complete name, or to retain the older name, "imperfect," may easily indicate the necessary change by a general direction to the class.

115. The past tense is formed on the present stem. It has the tense sign **bā** connecting the stem and the personal endings. In the active the vowel **ā** becomes short before the endings **-m**, **-t**, and **-nt**.

The endings are the same as in the present tense, except that the first person singular ends in **-m**. **Portō** and **monēō** are conjugated in the past indicative active as follows:

SINGULAR

portābam, *I was carrying or I carried*
 portābās, *you were carrying, you carried*
 portābat, *he, she, it was carrying, he carried, etc.*

PLURAL

portābāmus, *we were carrying, we carried*

 monēbātis, *you were warning, etc.*
 monēbant, *they were warning, etc.*

CORRELATIVE USE OF **HIC** AND **ILLE**

116. The forms of **hic** and **ille** are sometimes used in the same sentence to refer to contrasted persons or things. In this use **ille** is regularly translated *the former* and **hic** *the latter*.

Puer et puella labōrant. Ille impiger, haec pigra est.

The boy and the girl are working. The former is industrious, the latter is lazy.

THE DEMONSTRATIVE *IS*. DATIVE WITH SPECIAL VERBSTHE DEMONSTRATIVE *IS*

122. In addition to the demonstratives *hic* and *ille*, there is a third demonstrative, *is*, translated *this* or *that*, as the sense of the sentence in which it stands may require. It does not emphasize the idea that the thing to which it refers is near, as does *hic*, or that it is remote, as does *ille*. Usually it refers to something which has been recently mentioned. It is declined as follows:

IS AS A PRONOUN

123. The word *is* frequently serves as a personal pronoun of the third person, and is translated by a form of *he*, *she*, *it*, or (in the plural) *they*, as the meaning of the sentence requires.

Eum vidēbam, I saw him.

Amīcus eius benignus est, his (or her) friend is kind.

Eī multa dōna dās, you give him (or her) many gifts.

Amīcitiā eōrum dēsīderāmus, we desire their friendship. etc.

res **eius** and **eōrum** (as pronouns) may follow the nouns on which they depend.

ATIVE WITH SPECIAL VERBS¹

he meanings of which suggest the idea of *relation*, are followed by the dative, but English verbs take a direct object.

placet, *the horse pleases you.*

rtant verbs of this class which govern meaning to *favor, please, trust, obey, listen, pardon, spare, and persuade.* []

LESSON XVII

PAST INDICATIVE PASSIVE, FIRST AND SECOND CONJUGATIONS: ABLATIVE OF MEANS

THE PAST INDICATIVE PASSIVE

129. The past indicative passive of the first and second conjugations is formed as follows:

SINGULAR	SINGULAR
portābar, <i>I was being carried or I was carried</i>	monēbar
portābāris, -re, <i>you were being carried, etc.</i>	monēbāris, -re
portābātur, <i>he was being carried, etc.</i>	monēbātur
PLURAL	PLURAL
portābāmur, <i>we were being carried, etc.</i>	monēbāmur
portābāminī, <i>you were being carried, etc.</i>	monēbāminī
portābantur, <i>they were being carried, etc.</i>	monēbantur

a. The only difference between the active and the passive forms of this tense is in the personal endings. The *ā* of the tense sign becomes short before the endings -*r* and -*ntur*.

THE ABLATIVE OF MEANS

130. The means or instrument with which an act is done is expressed by the ablative without a preposition. This is called the Ablative of Means.

Galli gladiūs pignant, *the Gauls fight with swords.*

Puer saxō vulnerātur, *the boy is wounded by the stone.*

131. In translating the ablative of means into English, a preposition, *by* or *with*, is used. This use of the case is to be distinguished from the ablative of agent, which refers to the person by whom the act is done, and which always takes *ā* or *ab*, and from the ablative of accompaniment, which regularly takes *cum*.

(4) Give the third person singular in the present indicative passive and past indicative passive of *necō* and *terreō*.

LESSON XVIII

FUTURE INDICATIVE, ACTIVE AND PASSIVE, FIRST AND SECOND CONJUGATIONS

THE FUTURE TENSE

135. The future tense is formed on the present stem. In the first and second conjugations a tense sign, **bi**, is added to this stem. This tense sign becomes **bu** in the third person plural active and passive, and **be** in the second person singular passive. The **i** of the tense sign disappears before the endings **-ō** and **-or** in the first person singular.

The conjugation of **moneō** and **portō** in the future indicative, active and passive, is as follows:

ACTIVE

(3) Conjugate **compleō** and **superō** in the future indicative active and passive. (4) Give the third person plural active of **habeō** in the present, past, and future indicative.

LESSON XIX

POSSESSIVES OF THE THIRD PERSON: OMISSION OF
POSSESSIVES: PAST AND FUTURE
INDICATIVE OF *SUM*

POSSESSIVES OF THE THIRD PERSON

139. The possessive adjective of the third person, *suus*, *sua*, *sum*, is reflexive; that is, it indicates that the subject of the sentence or clause is the possessor.

Puer amicōs suōs laudat, the boy praises his (his own) friends.

Pueri amicōs suōs laudant, the boys praise their (their own) friends.

Fēmina filiam suam monet, the woman warns her daughter.

a. The gender and number of the subject of the sentence or clause in which a form of *suus* stands determine whether the meaning is *his*, *her*, *its*, or *their*. For the sake of emphasis or clearness, *suus* may sometimes be translated *his own*, *her own*, *its own*, or *their own*.

b. If the possessor is some other person than the subject, *his*, *her*, or *its* is regularly expressed by *eius*, the genitive singular of *is*, and *their* by *eōrum* or *eārum*, the genitive plural of *is*.

Amicōs eius laudant, they praise his friends.

Amicōs eōrum laudat, he praises their friends.

The genitive forms of *hic* and *ille* are sometimes used instead of those of *is*, to denote possession.

THE OMISSION OF POSSESSIVES

140. The possessives are often omitted in Latin if they are not emphatic or if they are not needed for the sake of

clearness. They are to be supplied in translation from Latin into English whenever the sense requires.

Fēmina filiā amat, the woman loves her daughter.

THE PAST AND FUTURE INDICATIVE OF SUM

141. The verb **sum** is conjugated as follows in the past and future indicative:

PAST	FUTURE
SINGULAR	
eram, <i>I was</i>	erō, <i>I shall be</i>
erās, <i>you were</i>	eris, <i>you will be</i>
erat, <i>he, she, it was</i>	erit, <i>he, she, it will be</i>
PLURAL

LESSON XX

PERFECT INDICATIVE ACTIVE: MEANINGS OF PERFECT AND PAST

THE PERFECT TENSE, ACTIVE VOICE

145. The perfect tense represents an act as completed at the time of speaking or writing, or refers to a past act without giving any indication of its continuance. It is translated by the English present perfect or by the English past tense, as the sense requires.

PERFECT INDICATIVE ACTIVE OF *PORTO*, *MONEO*, AND *SUM*

146. The verbs *portō*, *moneō*, and *sum* are conjugated in the perfect indicative active as follows:

SINGULAR

portāvī, *I have carried or I carried*

portāvī, *I have carried, I carried*

portāvistī, *you have carried, etc.*

portāvit, *he has carried, etc.*

PLURAL

portāvimus, *we have carried, etc.*

portāvistis, *you have carried, etc.*

ENDINGS OF THE PERFECT

147. The personal endings which are used in forming the perfect indicative active are different from those used in the other tenses. They are as follows:

SINGULAR	PLURAL
-ī	-imus
-istī	-istis
-it	-ērunt or -ēre

a. The use of the perfect endings is the same in all verbs, regular or irregular.

148. The perfect stem to which these endings are added is found by dropping the final ī of the first person singular. Thus, the perfect stem of **portō** is **portāv-**, of **moneō** is **monu-**, of **sum** is **fu-**.

149. The first person singular of the perfect indicative of all first conjugation verbs given thus far, except **iuvō**, **dō**, and **stō**, ends in **-āvī**, like the perfect of **portō**: **amāvī**, **postulāvī**, **explōrāvī**, etc. The perfect of **dō** is **dedī**, stem **ded-**; of **iuvō** is **iūvī**, stem **iūv-**; of **stō** is **stetī**, stem **stet-**.

150. Many (but not all) verbs of the second conjugation have perfects ending in **-uī**, like the perfect of **moneō**: **habuī**, **terruī**, etc.

MEANINGS OF THE PAST AND THE PERFECT

151. The perfect is distinguished from the past in meaning by the fact that the past represents a past act in progress or a situation in the past, while the perfect either represents an act as past, with no reference to its continuance, or brings into prominence the fact of its completion at the time of speaking or writing.

LESSON XXI

USE OF PARTICIPLES: THE PAST PARTICIPLE

THE PARTICIPLE

157. The participle is a form of the verb which partakes of the nature of an adjective. Like the adjective, it is declined, and agrees in gender, number, and case with the word to which it belongs. The tenses of the participles of Latin verbs are present, past, and future.

THE PAST PARTICIPLE

158. English has both a past active and a past passive participle: active, *having carried*; passive, *having been carried*. Latin has the past passive participle, but no past active participle.

THE FORMS OF THE PAST PARTICIPLE

159. The past participle of *portō* is *portātus*, -a, -um, declined like *bonus*. It is translated *having been carried*, or *carried*.

Saxum ā puerō portātum magnum est, the stone carried (i. e., which was carried) by the boy is large.

160. The past participle of *iuvō* is *iūtus*, -a, -um; of *dō*, *datus*, -a, -um (differing from *portātus* in having the *a* short). All other verbs of the first conjugation which have been given form their past participles like *portō*: *laudātus*, *amātus*, etc.

The past participle of *moneō* is *monitus*, -a, -um; of *videō*, *visus*, -a, -um.

a. The past passive participle is used in Latin more frequently than in English. It is sometimes translated by a clause: *portātum* in the illustrative sentence above may be translated, *which was carried*.

LESSON XXII

PRINCIPAL PARTS: VERB STEMS

THE PRINCIPAL PARTS OF THE VERB

164. The present indicative active (first person singular), the present infinitive active, the perfect indicative active (first person singular), and the past participle, are called the Principal Parts of the verb. Any form of a verb may be made when these are known.

The principal parts of **portō** and **moneō** are as follows:

portō, portāre, portāvī, portātum
moneō, monēre, monuī, monitum

a. The neuter form of the past participle is given in the principal parts, for the reason that the past participles of some verbs have no masculine or feminine forms.

THE PRINCIPAL PARTS OF FIRST CONJUGATION VERBS

165. All first conjugation verbs given thus far, except **iuvō, dō, and stō**, form their principal parts like **portō**. The principal parts of these three are as follows:

dō, dare, dedi, datum
iuvō, iuvāre, iuvi, iutum
stō, stāre, steti

a. The fourth principal part of **stō** will be explained later; **dō** is irregular in having the **a** short in the infinitive.

THE STEMS OF THE VERB

166. A verb regularly has three stems: the present, the perfect, and the participial. The present stem is found by dropping **-re** from the present active infinitive, and the perfect stem by dropping **-i** from the first person singular of the perfect indicative active (see Lessons V and XX). The participial stem is found by dropping **-um** from the past participle: **portātum**, stem **portāt-**; **monitum**, stem **monit-**.

USE OF THE STEMS

167. The present, the past, and the future indicative, active and passive, are formed on the present stem.

The perfect stem is used only in the active voice.

Only a few forms are made on the participial stem.

168. The principal parts of the second conjugation verbs which have been given thus far are as follows:

- habeō, habēre, habuī, habitum
- moneō, monēre, monuī, monitum
- pateō, patēre, patuī
- placeō, placēre, placuī, placitum
- studeō, studēre, studuī
- terreō, terrēre, terruī, territum
- timeō, timēre, timuī

- compleō, complere, complēvi, complētum
- faveō, favēre, fāvi, fautum
- moveō, movēre, mōvi, mōtum
- videō, vidēre, vidi, visum

a. The verbs of which only three principal parts are given have no past participle.

EXERCISES

169. 1. Magnum numerum equōrum in agrō vidi. 2. Amici tui tibi multos libros pulchros dederunt. 3. Hic puer parvus in silvā mansit. 4. Periculum vitavisti et laudaberis. 5. In multis oppidis habitavi et multos amicos habeo. 10. In eo bellō arma Gallorum erant gladii et sagittae.

that the connecting vowel, *i*, is short. In the second person singular of the passive in the present tense the connecting vowel is *e*, while in the corresponding form of the fourth conjugation it is *i*.

I. portāre	-āre	portā-
II. monēre	-ēre	monē-
III. { dūcere capere	-ere	dūce- cape- }
IV. audire	-ire	audi-

THE PRESENT INDICATIVE

222. The present tense is formed by adding the personal endings to the present stem. In the first person singular of the first conjugation and of the *ō* verbs of the third conjugation the stem vowel disappears. In the third conjugation the vowel of the stem ending becomes *u* before *-nt* and *-ntur*. It becomes *i* before all other endings except *-ris*. In all *iō* verbs *-nt* and *-ntur* are preceded by *iu*.

223. The sign of the past tense, **bā**, appears in all four conjugations. In third conjugation **ō** verbs the short **e** of the stem becomes long before **bā**, making their past tense identical with that of the second conjugation. Third conjugation verbs in **iō** and all fourth conjugation verbs have the tense sign preceded by **iē**.

LESSON XXXIII

REVIEW OF THE PERFECT SYSTEM, INDICATIVE MOOD:
WORD ORDER

REVIEW OF THE PERFECT SYSTEM IN THE ACTIVE VOICE

228. (1) The formation of the perfect system is the same in all four conjugations. The perfect stem (which is used only in the active voice) is found by dropping the *i* of the perfect active indicative, the third of the principal parts. The endings of the perfect indicative active are the same for all verbs.

		SINGULAR

(3) The sign of the future perfect is **eri**, which is added to the perfect stem. Before **ō** the *i* of the tense sign disappears.

portāveris,	monueris,	dūxeris,	cēperis,	audīveris,
etc.	etc.	etc.	etc.	etc.

REVIEW OF THE PERFECT SYSTEM IN THE PASSIVE VOICE

229. The formation of the perfect system in the passive is the same in all four conjugations. The perfect is made up of the past passive participle and the present tense of **sum**; the past perfect of the past passive participle and the past tense of **sum**; and the future perfect of the past passive participle and the future tense of **sum**.

PERFECT	PAST PERFECT	FUTURE PERFECT
portātus sum	portātus eram	portātus erō
monitus sum,	monitus eram,	monitus erō,
<i>etc.</i>	<i>etc.</i>	<i>etc.</i>

VARIATION FROM THE NORMAL WORD ORDER

230. The normal order of a Latin sentence requires that the subject, with its modifiers, stand first, and that the verb, preceded by its modifiers, stand last. But there are many requirements of emphasis which may change this order. Any word which is to be emphasized may stand in a different position in the sentence from that in which it would normally be placed. The fact that the form of a Latin word shows what its relation is to other words, makes possible a much freer arrangement in Latin than in English. If the subject is to be made emphatic, it may be placed last instead of first. But the fact that any word is put in an unusual position means that one or more of the other words in the sentence will be crowded out of the normal position. Sometimes the normal order is changed merely for the sake of variety.

LESSON XXXIV

ADJECTIVES WITH THE GENITIVE IN *-ius*

234. There are nine adjectives which have the genitive singular ending in *-ius* and the dative singular ending in *-ī*. In the other cases of the singular and in all the cases of the plural they have the same endings as adjectives of the first and second declensions. The vocative is lacking except in rare uses of *ūnus* and *sōlus*. Most of these words are used also as pronouns. They are as follows:

<i>alius, alia, aliud</i> , another	<i>ūnus, -a, -um</i> , one
<i>sōlus, -a, -um</i> , alone, only	<i>tōtus, -a, -um</i> , whole
<i>ūllus, -a, -um</i> , any	<i>nūllus, -a, -um</i> , no

alter, altera, alterum, the other (*of two*)
neuter, neutra, neutrum, neither
uter, utra, utrum, which (*of two*)

235. These adjectives are declined as follows:

SINGULAR

<i>Masc.</i>	<i>Fem.</i>	<i>Neut.</i>	<i>Masc.</i>	<i>Fem.</i>	<i>Neut.</i>
<i>sōlus</i>	<i>sōla</i>	<i>sōlum</i>	<i>alter</i>	<i>altera</i>	<i>alterum</i>

a. *Alius* has the neuter *aliud*. Otherwise it is declined like the remaining words of the group. The *i* of the genitive ending of *alter* is sometimes short (*alterius*).

b. These words are sometimes used in pairs (correlatives) as follows:

alius.....*alius* = *one* *another*.

aliī.....*aliī* = *some* *others*.

alter.....*alter* = *one* *the other*.

alterī....*alterī* = *the one party*....*the other party*.

Alius fugit, alius manet in castris, one flees, another remains in the camp.

237. 1. The nature of the whole place was unknown. 2. The one was a Gaul, the other was a German. 3. He will give the letter to the messenger alone. 4. Some fight bravely, others hasten from the camp. 5. One demands aid, another avoids danger. 6. This boy has no book. 7. The danger of neither is great.

SUGGESTED DRILL

(1) Explain the case of *auxiliō* in sentence 5, 236. (2) Decline together *neuter liber*. (3) Decline together *ūnum oppidum*. (4) Give a synopsis of *amittō* in the third singular active of the indicative. (5) Conjugate *trādō* in the perfect passive indicative and the past perfect passive indicative. (6) Conjugate *recipiō* in the future perfect, active and passive.

LESSON XXXV

THE THIRD DECLENSION

238. The third declension has three classes of nouns, known as Consonant Stems, *i*-Stems, and Mixed Stems. The genitive ending is *-is*.

a. Some masculine and feminine nouns have a nominative ending *-s*. If the stem ends in *-c* or *-g* the combination of the final *-c* or *-g* of the stem with *-s* gives *-x*: **dux**, nominative from the stem **duc-**; **lēx** nominative from the stem **lēg-**. If the stem ends in *-d* or *-t* the final consonant is dropped before *-s*: **laus**, nominative from the stem **laud-**. If the vowel *i* stands before the final consonant of the stem it is frequently changed to *e* in the nominative: **princeps**, nominative from the stem **prīncip-**, **miles**, nominative from the stem **milit-**.

Consonant stems are declined as follows:

lēx, F., *law*
BASE, **lēg-**

miles, M., *soldier*
BASE, **milit-**

		SINGULAR	TERMINATIONS
NOM.	lēx	NOM. miles	-s

b. Nouns with stems ending in **-tr** have the nominative ending in **-ter**: **frāter** from the stem **frātr-**.

c. Nouns with stems ending in **-din** and **-gin** replace **-in** of the stem by **-ō** in the nominative: **virgō** from the stem **virgin-**, **multitūdō** from the stem **multitūdin-**. The nominative **homō** is formed by replacing **-in** of the stem in the same manner.

ABL.	frātribus	ABL. hominibus	-ibus

d. Nouns with stems ending in **-ōn** form the nominative by dropping **n**: **legiō** from the stem **legiōn-**.

e. Most nouns with stems ending in **-l** or **-r** have the nominative identical with the stem. A long vowel of the stem is shortened before a final **l** or **r** of the nominative.

f. The base is identical with the stem in nouns with consonant stems. Since the base can always be found by dropping the genitive ending, any noun of this class can be declined according to the models given above when its genitive is known.

LESSON XXXVI

THE THIRD DECLENSION, CONSONANT STEMS (Continued):
DATIVE OF REFERENCE

NEUTER CONSONANT STEMS

244. There are many neuter nouns among the consonant stems of the third declension. These, like the masculine and feminine nouns, form the nominative in different ways.

a. Nouns which have **-in** as the stem ending change **i** of the stem to **e** in the nominative: **flūmen** from the stem **flūmin-**. A few other nouns likewise change the vowel before the final consonant of the stem in forming the nominative: **caput** from the stem **capit-**.

THE DATIVE OF REFERENCE

245. The dative is often used to refer to a person who is likely to be affected favorably or unfavorably by an act or situation, or with reference to whom an act is said to be done or a situation to exist. This is called the Dative of Reference.

Librum amicō ēmi, *I bought a book for a friend.*

a. This use of the dative is sometimes found with words denoting things.

b. The dative of reference is often used in connection with a dative of purpose.

Militēs oppidānis auxiliō erant, *the soldiers were a help (for a help) to the townspeople.*

Vir amicō auxiliō vēnit, *the man came to help (as a help for) his friend.*

THE CONQUEST OF GAUL

The greater part of the region known as Gaul was conquered by the Romans in a series of campaigns lasting from 58 to 50 B. C. The Roman army was under the command of Gaius Julius Caesar, who was governor of the Roman province lying to the south of independent Gaul. The province had been conquered and brought under Roman authority some years earlier. The extension of Roman influence over the whole of Gaul brought about the adoption of the Latin language and of Roman customs in this important part of Europe, a result which has affected all the later history of France and of the whole civilized world.

The successes of Caesar in this war made it possible for him to become the ruler of Rome a little later, and to change the form of its government from a republic to a monarchy.

The main events of the first two years of the war are told in connection with the lessons which follow.

LESSON LI

DATIVE WITH COMPOUNDS: DATIVE OF POSSESSION

THE DATIVE WITH COMPOUNDS

324. Frequently with verbs compounded with ante, ob, prae, and sub, the noun or pronoun connected in sense with the preposition is put in the dative.¹

Prōvinciae praeest, *he is in command of the province.*

a. The dative may also be used in the same manner with compounds of ad and in when motion is not expressed.

Bellum Gallis inferunt, *they make war on the Gauls.*

b. If the simple verb is transitive, the compound may take an accusative and a dative.

Labienum castris. praefecit, *he placed Labienus in command of the camp.*

c. Often the dative with a compound is merely an indirect object or a dative of reference, or is to be explained by the rule of Lesson XVI.

THE DATIVE OF POSSESSION

325. The possessor of something may be denoted by a noun or pronoun in the dative case, with the thing possessed in the nominative as the subject of a form of the verb meaning *to be*.

Puerō² gladius est, *the boy has a sword.*

¹ Other prepositions whose compounds sometimes take a dependent dative are circum, con, inter, post, prō, super.

² The exact force of the case in this construction cannot be rendered in idiomatic English.

COMPARISON OF ADJECTIVES: DECLENSION OF COMPARATIVES

THE COMPARISON OF ADJECTIVES

334. (1) The comparative degree of an adjective is formed by replacing the genitive ending of the positive with *-ior* for the masculine and feminine and with *-ius* for the neuter.

The superlative is regularly formed by replacing the genitive ending of the positive with *-issimus (-a, -um)*.

POSITIVE	COMPARATIVE	SUPERLATIVE
<i>altus, high</i>	<i>altior, altius, higher</i>	<i>altissimus, -a, -um,</i> <i>highest</i>
<i>fortis, brave</i>	<i>fortior, fortius, braver</i>	<i>fortissimus, -a, -um,</i> <i>bravest</i>

(2) The comparatives are third declension adjectives of two endings and are declined as follows:

SINGULAR		PLURAL	
<i>Masc. and Fem.</i>	<i>Neut.</i>	<i>Masc. and Fem.</i>	<i>Neut.</i>
NOM. <i>lātior</i>	<i>lātius</i>	<i>lātiōrēs</i>	<i>lātiōra</i>

COMPARISON OF ADJECTIVES (Continued): ABLATIVE OF COMPARISON

COMPARISON OF ADJECTIVES (Continued)

POSITIVE	COMPARATIVE	SUPERLATIVE
miser	miserior, miserius	miserrimus, -a, -um
ācer	ācrior, ācrius	ācerrimus, -a, -um

POSITIVE	COMPARATIVE	SUPERLATIVE
facilis	facilior, -ius	facillimus, -a, -um
similis	similior, -ius	simillimus, -a, -um

a. Other adjectives ending in **-lis** form the superlative regularly with **-issimus**.¹

THE ABLATIVE OF COMPARISON

340. With a comparative, if **quam, than**, is omitted, the noun or pronoun denoting the person or thing with which comparison is made, is put in the ablative.

Ille puer fortior frātre est, that boy is braver than his brother.

¹ **gracilis**, slender, is sometimes given in this list of adjectives, but its superlative is so rare as to make it of little importance.

LESSON LIX

PRESENT PARTICIPLE: ABLATIVE OF RESPECT

THE PRESENT PARTICIPLE

365. The present active participle of a Latin verb ends in **-ns**, and is formed on the present stem. Its formation in the regular verbs of the four conjugations is as follows:

I.	II.	III.		IV.
portō	moneō	dūcō	capiō	audiō
portāns,	monēns,	dūcēns,	capiēns,	audiēns,
<i>carrying</i>	<i>warning</i>	<i>leading</i>	<i>taking</i>	<i>hearing</i>

a. Like the other participles, the present participle agrees in gender, number, and case with the noun or pronoun to which it belongs. It is declined as an adjective of the third declension with the stem ending in **-nt**.

SINGULAR

<i>Masc. and Fem.</i>	<i>Neut.</i>

GEN. portantium	portantium
DAT. portantibus	portantibus
ACC. portantēs (-īs)	portantia

b. The present active participle is used in Latin less frequently than in English. There is no present passive participle in Latin.

THE ABLATIVE OF RESPECT

366. The ablative without a preposition is used to indicate in what respect a statement is true.

LESSON LX

THE ABLATIVE ABSOLUTE

370. A noun or pronoun in the ablative case, together with a participle, an adjective, or another noun in agreement, may be used to refer to some circumstance or event loosely connected with the rest of the sentence.

Monte occupātō militēs expectābant, *the mountain having been seized (after seizing the mountain), the soldiers waited.*

Nūllō prohibente iter fecērunt, *no one preventing, they made their march.*

Helvētiis invītis Orgetorix haec fecit, *the Helvetians being unwilling, Orgetorix did these things.*

Labiēnō duce montem ascendērunt, *Labiēnus being leader, they ascended the mountain.*

a. The original force of the case may be seen if these phrases are translated with the English preposition *with*.

with the mountain seized

with no one preventing

with the Helvetians unwilling

with Labienus (as) leader

b. The participle *being*, which is often employed in translating the ablative absolute, has no equivalent in Latin.

371. Often the ablative absolute is best translated by a clause introduced by *when, after, if, since, or although*, as the sense of the main clause may suggest.

Monte occupātō, when the mountain had been seized.

a. Various prepositional phrases, also, may be employed in translating this ablative.

Sēquanis invītis, against the will of the Sequani.
Caesare cōnsule, in the consulship of Caesar.

LESSON LXII

PERSONAL PRONOUNS: OBJECTIVE GENITIVE

THE PERSONAL PRONOUNS

380. As has been seen, the personal pronouns as subjects may, if not emphatic, be indicated by the endings of the verb. The nominative forms are used, however, when they are needed for emphasis or contrast.

The personal pronouns of the first and second persons are declined as follows:

	SINGULAR	PLURAL		SINGULAR	PLURAL
NOM.	ego	nōs		tū	vōs
GEN.	meī	nostrum, nostrī		tuī	vestrum, vestrī
DAT.	mihi	nōbīs		tibi	vōbīs
ACC.	mē	nōs		tē	vōs
ABL.	mē	nōbīs		tē	vōbīs

a. As a pronoun of the third person, the forms of **is** are commonly employed.

THE OBJECTIVE GENITIVE

381. Certain nouns and adjectives which express action or feeling sometimes take a dependent genitive in a relation similar to that of the direct object to the verb on which it depends. This is called the Objective Genitive

Metus periculī, fear of danger.

a. The forms **meī, tuī, nostrī, vestrī**, are used as objective genitives and seldom in any other way. Possession is expressed in the first and second persons by the possessive adjectives **meus, tuus, noster, vester**, as explained in 80.

b. The forms **nostrum** and **vestrum** are used as genitives of the whole.

SUGGESTED DRILL

(1) Explain the reason for the use of the personal pronouns in sentence 1, 383. (2) Point out an example of the use of the objective genitive in 383. (3) Point out two phrases in 384 which will be translated by the objective genitive. (4) Give a synopsis of **redeō** in the third person, singular and plural, active voice. (5) Conjugate **possum** in the present tense.

LESSON LXIII

REFLEXIVES: **CUM** AS ENCLITIC

THE REFLEXIVE PRONOUN

385. The reflexive pronoun is used in the genitive, dative, accusative, or ablative to refer back to the subject.

Nōn mē laudō, *I do not praise myself.*

Tibi placēs, *you please yourself.*

Sē dēfendit, *he defends himself.*

a. The reflexive must be distinguished from the intensive **ipse**, which merely emphasizes the word with which it agrees. The reflexive denotes the same person or thing as the subject, but its case depends on some other element of the sentence.

Vir ipse amicum accūsāt (intensive), *the man himself accuses his friend.*

Vir sē accūsāt (reflexive), *the man accuses himself.*

386. In the first and second persons the forms of **ego** and **tū** (excluding, of course, the nominative) serve as reflexives. In the third person there is a reflexive pronoun which has no other uses. It is translated *himself*, *herself*, *itself*, or *themselves*, as the gender and number of the subject may require.

	SINGULAR	PLURAL
GEN.	suī	suī
DAT.	sibi	sibi
ACC.	sē or sēsē	sē or sēsē
ABL.	sē or sēsē	sē or sēsē

THE ENCLITIC USE OF **CUM**

387. With the ablatives **mē**, **tē**, **sē**, **nōbis**, **vōbis**, and regularly **quibus**, the preposition **cum** is used as an enclitic. That is, it is added to the word as a final syllable.

mēcum, *with me.*

tēcum, *with you, etc.*

FORMATION OF THE INFINITIVES .

392. (1) In the first, second, and fourth conjugations the present passive infinitive is formed by changing the final *e* of the present active infinitive to *i*. In the third conjugation the termination *-ere* is replaced by *i*.

(2) The past active infinitive is formed with the termination *-isse*, which is added to the perfect stem.

(3) The past passive participle, which is used in forming the past passive infinitive, and the future active participle, which is used in forming the future active infinitive, agree in gender, number, and case with the subject.

(4) The ending *-um* is always retained with the future passive infinitive. The form used in this infinitive is not a participle.¹ The future passive infinitive is not much used.

EXERCISES

LESSON LXV

INFINITIVE WITH SUBJECT ACCUSATIVE: INFINITIVES OF
SUM AND EŌ

THE INFINITIVE WITH SUBJECT ACCUSATIVE

395. Verbs of *knowing, thinking, saying, hearing, and observing* may take a dependent infinitive with its subject in the accusative case. The infinitive when thus used is regularly translated by an English indicative introduced by *that*.

a. The infinitive in this use will be present, past, or future according as the time to which it refers is present, past, or future, from the point of view of the verb on which it depends.

Hostēs fugere videō, I see that the enemy are fleeing.

Hostēs fugere vidēbam, I saw that the enemy were fleeing.

Hostēs fūgissee videō, I see that the enemy have fled.

Hostēs fūgissee vidēbam, I saw that the enemy had fled.

Auxilium mittit nē hostēs oppidum capiant, *he sends aid that the enemy may not capture the town.*

a. The act which is expressed by a clause of this form is one which is desired (or one the prevention of which is desired). Hence the force of the mood is the same as in the independent clauses of the preceding lesson, that is, it expresses *desire* or, more exactly, *will*.

b. In English, purpose is commonly expressed by the infinitive or by phrases introduced by *in order to*, or by clauses introduced by *that* or *in order that*.

He came to see his friend; he came in order to see his friend; he came in order that he might see his friend.

Such phrases or clauses cannot be translated into Latin by the infinitive, but are rendered by **ut** (or **nē**) and the subjunctive. If the purpose clause is negative, **nē** is used.

Prō hīs Dīviciācus Haeduus locūtus est. Caesar eis quoque pepercit sed magnum numerum obsidum poposcit. LESSON XCV

THE GERUNDIVE: ORDINAL NUMERALS

557. The future passive participle of a transitive verb is often used in agreement with a noun or pronoun in phrases which are equivalent in meaning to a gerund with an object.¹

Spēs urbis capiendae. The meaning is the same as
Spēs urbem capiendī, *hope of capturing the city.*

The future passive participle when thus used is called the Gerundive. The gerundive may be used in either number and in any case to agree with the noun or pronoun to which it belongs.

a. Since the gerund cannot stand as the object of a preposition and at the same time govern an object, gerundive phrases are frequently used with the forms of transitive verbs. The English translation of such phrases is the same as if the gerundive were a gerund having as its object the word with which the gerundive agrees.

b. The case uses of the gerundive construction are in general the same as those of the gerund.

Cupidus oppidī expugnandī, *desirous of storming the town.*

Auxili ferendī causā, *for the purpose (sake) of bringing aid.*

Ad eas rēs cōficiendās, *for accomplishing these things.*

Dē auxiliō mittendō, *about (concerning) sending aid.*

Lapidibus portandīs, *by carrying stones.*

¹ The gerundive construction was not a substitute for the gerund in the thought of the Romans, but was probably the usage from which the gerund was derived.

558. The following distinctions between the gerund and gerundive are to be observed:

GERUND	GERUNDIVE
A noun	A participle
Active in meaning	Passive
Neuter gender	All genders
Used only in the singular	Both numbers

ORDINAL NUMERALS

559. The first twenty ordinals are as follows:

<i>prīmus, first</i>	<i>ūndecimus, eleventh</i>
<i>secundus, second</i>	<i>duodecimus, twelfth</i>
<i>tertius, third</i>	<i>tertius decimus, thirteenth</i>
<i>quārtus, fourth</i>	<i>quārtus decimus, fourteenth</i>
<i>quīntus, fifth</i>	<i>quīntus decimus, fifteenth</i>
<i>sextus, sixth</i>	<i>sextus decimus, sixteenth</i>
<i>septimus, seventh</i>	<i>septimus decimus, seventeenth</i>
<i>octāvus, eighth</i>	<i>duodēvicēsīmus, eighteenth</i>
<i>nōnus, ninth</i>	<i>ūndēvicēsīmus, nineteenth</i>
<i>decimus, tenth</i>	<i>vīcēsīmus, twentieth</i>

a. The ordinals are declined as adjectives of the first and second declensions. Compound ordinals, such as *tertius decimus*, have both parts declined.

LESSON XCVI

REVIEW OF PARTICIPLES: NEGATIVE COMMANDS

REVIEW OF PARTICIPLES

565. The Latin verb has four participles, the present active, the past passive, and the future, active and passive.

PRESENT		PAST		FUTURE	
ACTIVE	PASSIVE	ACTIVE	PASSIVE	ACTIVE	PASSIVE
portāns	—	—	portātus	portātūrus	portandus
monēns	—	—	monitus	monitūrus	monendus
dūcēns	—	—	ductus	ductūrus	dūcendus
capiēns	—	—	captus	captūrus	capiendus
audiēns	—	—	auditus	auditūrus	audiendus

a. In English there is a present passive participle, *being carried*, etc., and a past active participle, *having carried*, etc. These two participles are lacking in the Latin verb.

b. Deponent verbs have the same number of participles as other verbs: **cōnāns, cōnātus, cōnātūrus, cōnandus**, etc. The past participle of a deponent verb is usually active in meaning, but sometimes it is passive. The sense of the sentence in which the participle stands will make it possible to decide in which voice it is used.

c. The present participle is declined as an adjective of the third declension: **portāns, portantis**, etc. The other participles are declined as adjectives of the first and second declensions: **portātus, -a, -um**, etc.

NEGATIVE COMMANDS

566. Negative commands (prohibitions) in the second person are frequently expressed by the imperative of **nōlō (nōlī, nōlīte)**, followed by the infinitive of the verb expressing the act forbidden: **Nōlī eum iuvāre**, *do not help him*.

LESSON XCVII

CONDITIONS AND CONCLUSIONS: NON-COMMITTAL
CONDITIONAL SENTENCES

CONDITIONAL SENTENCES

570. A conditional sentence is a complex sentence, the subordinate clause of which is introduced by *if*. The subordinate clause is called the Condition, the main clause is called the Conclusion.

NON-COMMITTAL CONDITIONAL SENTENCES¹

571. In Latin, a conditional sentence which does not imply that the condition is either true or false regularly has both verbs in the indicative.

Sī puer domi est, māter laeta est, if the boy is at home, his mother is glad.

Sī hostēs flūmen trānsiērunt, nostrī pontem nōn dēfendērunt, if the enemy have crossed the river, our men did not defend the bridge.

a. Sometimes an imperative or a subjunctive of desire is used in the conclusion of a conditional sentence of this kind instead of an indicative.

Sī pācem cupitis, arma trāдите, if you desire peace, surrender your arms.

b. A non-committal conditional sentence referring to future time is commonly called a Future More Vivid conditional sentence. The verb of its conditional clause is usually translated by an English present tense, but the Latin sentence has the verb of the condition as well as of the conclusion in the future or future perfect.

¹ Conditional sentences of this type are sometimes called *neutral* conditional sentences.

BEGINNING OF THE BATTLE

Equitēs Rōmānī flūmen trāsgressi cum equitātū hostium proelium commīsērunt. Hostēs ad silvās sē recēpērunt ac rūsus ex silvis in nostrōs impetum fēcērunt. Interim sex legiōnēs quae vēnerant castra mūnīre coepērunt. Tum hostēs qui in silvis latēbant subitō prōvolāvērunt impetumque in nostrōs equitēs fēcērunt. His pulsīs flūmen trāsiērunt et incredibili celeritāte ad castra contendērunt.

(5) Give the past and future infinitives of *trāsgredior*.

LESSON XCVIII

CONDITIONAL SENTENCES CONTRARY TO FACT:
REVIEW OF CASES WITH PREPOSITIONS

CONDITIONAL SENTENCES, CONTRARY TO FACT

575. A conditional sentence which implies by its form that the condition is not true and that the actual situation is not that which is referred to in the conclusion is called a conditional sentence Contrary to Fact.

If he had seen the danger, he would have avoided it
(implying that he did not see the danger and that he did not avoid it).

576. In Latin, a conditional sentence contrary to fact has its verbs in the past or the past perfect subjunctive; the past to express present time, and the past perfect to express past time.

Sī fortēs militēs habērēmus, in periculō nōn essēmus,
if we had brave soldiers, we should not be in danger.

Sī fortēs militēs habuissēmus, in periculō nōn fuissēmus,
if we had had brave soldiers, we should not have been in danger.

REVIEW OF CASES WITH PREPOSITIONS

577. The following prepositions used in this book always have their objects in the ablative case: **ā** (ab), **dē**, **ē** (ex), **cum**, **prō**, **sine**.

In phrases denoting the place toward which motion is directed, **in** and **sub** have their objects in the accusative case; in phrases denoting the place in which something exists or some act is done, they have their objects in the ablative case.

All other prepositions used in this book have their objects in the accusative case.

— locus militibus dēfendendus est.

ROMAN DISCIPLINE

Caesarī omnia ūnō tempore agenda erant. Incursus hostium magnam partem eārum rērum impediēbat quās ratiō rei militāris postulābat. Militēs autem superiōribus proeliis exercitātī fuerant, et lēgātī quī legiōnibus praeerant imperium Caesaris nōn exspectāvērunt. Itaque exercitus instrūctus est magis ut (as) necessitās temporis (postulābat) quam ut ratiō rei militāris postulābat.

580. 1. If the soldiers had fortified the camp, the enemy would not have made an attack. 2. If the soldier had set out from the camp, he would have been captured. 3. (3) Explain the use of the tenses of the verbs in sentence 3, 579. (4) Explain the case of *militibus* in sentence 5 and of *Caesarī*, line 6, 579.

LESSON XCIX

FUTURE LESS VIVID CONDITIONAL SENTENCES: *ISTE*

FUTURE LESS VIVID CONDITIONAL SENTENCES

581. A conditional sentence which implies doubt on the part of the speaker or writer as to the fulfillment of the condition, and which has as its conclusion a verb denoting an act as conceivable or imaginable, is called a Future Less Vivid conditional sentence. Its verbs stand in the present (or perfect) subjunctive.

Sī hostem videat, fugiat, if he should see the enemy, he would flee.

a. The perfect is used in the place of the present when the completion of the act is prominent in thought.

b. The verbs of a future more vivid conditional sentence are translated with the auxiliaries *shall* and *will*, or (in the condition) by the present tense. The verbs of a future less vivid conditional sentence are translated with *should* and *would*.

THE DEMONSTRATIVE *ISTE*

582. Besides *hic*, *ille*, and *is*, there is another demonstrative, *iste*, translated *that of yours*, or simply *that*. It is less frequently used than the others and commonly refers to something associated with the person addressed. It is declined like *ille*.

<i>Masc.</i>	<i>Fem.</i>	<i>Neut.</i>
<i>iste</i>	<i>ista</i>	<i>istud</i>
<i>istiūs</i>	<i>istiūs</i>	<i>istiūs, etc.</i>

a. *Iste* is sometimes used to express contempt.

¹ *Spērō* is followed by indirect discourse.

THE NERVII IN THE ROMAN CAMP

Pars hostium ab Rōmānīs repulsa statim fūgit. Sed cum castra Rōmāna nūdāta essent, magnus numerus Nerviorum ad eum locum contendit. Eō tempore equitēs Rōmānī in castra sē recipiēbant, sed, hostibus visīs in castrīs, aliam in partem fugam petiērunt. Interim duodecima legiō et septima ab hostibus premēbantur.

Since the scouts who had been sent ahead had not seen the enemy, the soldiers did not fear danger. 3. If the town had been captured, many would have been killed. 4. If the legion should cross the river, the cavalry would flee.

FUTURE IMPERATIVE: SUBJUNCTIVE BY ATTRACTION

THE FUTURE IMPERATIVE

586. The forms of the future imperative are found in the second and third persons. They are as follows:

ACTIVE

SINGULAR

2. portātō	monētō	mittitō	capitō	audītō
3. portātō	monētō	mittitō	capitō	audītō

2. portātor	monētor	mittitor	capitor	audītor
3. portātor	monētor	mittitor	capitor	audītor

PLURAL

2. [Lacking]	_____	_____	_____	_____
3. portantor	monentor	mittuntor	capiuntor	audiuntor

a. The future imperative is used when there is a clear reference to future time indicated by an adverb or other expression of time. It is translated *thou shalt carry, he shall carry, or let him carry, etc.*

b. The verbs **meminī** and **sciō** regularly (and **habeō** occasionally) use the future imperative instead of the present.

THE SUBJUNCTIVE BY ATTRACTION

587. Sometimes a subordinate clause which would otherwise have its verb in the indicative takes the subjunctive because it is closely dependent on a subjunctive or an infinitive.

Ita ācritēr pugnāvērunt ut omnēs quī in proeliō essent vulnerārentur, they fought so fiercely that all who were in the battle were wounded.

Conditā civitāte, quam ex nōmine suō Rōmam vocāvit, haec ferē ēgit. Multitūdinem finitimōrum in cīvitātem recēpit, centum ex seniōribus lēgit, quōrum cōsiliō omnia ageret, quōs senātōrēs nōmināvit propter senectūtem. Numa, the Peaceful King

Posteā Numa Pompilius rēx creātus est, quī bellum 20 quidem nūllum gessit, sed nōn minus cīvitātī quam Rōmulus prōfuit. Nam et lēgēs Rōmānis mōrēsque cōstituit, quī cōsuetūdine proeliōrum iam latrōnēs ac

sēmibarbarī putābantur, et annum dēscripsit in decem mēnsēs prius sine aliquā supputātiōne cōnfūsum, et infinīta Rōmae sacra ac templa cōstituit. Morbō dēcessit quad-rāgēsīmō et tertiō imperiī annō.

Tullus Hostilius, the Warrior

5 Huic successit Tullus Hostilius. Hic bella reparāvit, Albānōs vīcit, quī ab urbe Rōmā duodecimō miliārīō sunt, Vēientēs et Fidēnātēs, quōrum aliī sextō miliārīō absunt ab urbe Rōmā, aliī octāvō decimō, bellō superāvit, urbem ampliāvit adiectō Caeliō monte. Cum trīgintā et duōs
10 annōs rēgnāsset, fulmine ictus cum domō suā ārsit.

Ancus Marcius. Expansion of Roman Power

Post hunc Ancus Mārcius, Numae ex filiā nepōs, suscepit imperium. Contrā Latīnōs dīmīcāvit, Aventīnum montem cīvitatī adīecit et Iāniculum, apud ōstium Tiberis cīvitatē suprā mare sextō decimō miliārīō ab urbe Rōmā
15 condidit. Vicēsīmō et quārtō annō imperiī morbō periit.

Tarquin the Elder. Development of the City

Deinde rēgnum Prīscus Tarquinius accēpit. Hic numerum senātōrum duplicāvit, circum Rōmae aedificāvit, lūdōs Rōmānōs instituit, quī ad nostram memoriā permanent. Vīcit idem etiā Sabīnōs et nōn parum agrōrum
20 sublātum isdem urbis Rōmae territōriō iūnxit, primusque triumphāns urbem intrāvit. Mūrōs fēcit et cloācās, Capitōlium inchoāvit. Tricēsīmō octāvō imperiī annō per Ancī filiōs occīsus est, rēgis eius, cui ipse successerat.

Servius Tullius. Further Expansion

Post hunc Servius Tullius suscepit imperium, genitus ex
25 nōbili fēminā, captivā tamen et ancillā. Hic quoque Sabīnōs subēgit, montēs trēs, Quirīnālem, Viminālem,

Ēsquilinum, urbī adiūnxit, fossās circum mūrum dūxit. Prīmus omnium cēsum ordināvit, quī adhūc per orbem terrārum incognitus erat. Sub eō Rōma omnibus in cēsum delātis habuit capita LXXXIII milia cīvium Rōmānōrum cum hīs, quī in agrīs erant. Occīsus est scelere 5 generī suī Tarquinī Superbī, filiī eius rēgis, cui ipse successerat, et filiae, quam Tarquinius habēbat uxōrem.

Tarquin the Proud. End of the Kings

L. Tarquinius Superbus, septimus atque ultimus rēgum, Volscōs, quae gēns ad Campāniam euntibus nōn longē ab urbe est, vicit, Gabiōs cīvitātem et Suessam Pōmētiam 10 subēgit, cum Tuscīs pācem fēcit et templum Iovī in Capitoliō aedificāvit. Postea Ardeam oppugnāns, in octāvō decimō miliāriō ab urbe Rōmā positam cīvitātem, imperium perdidit. Cumque imperāssset annōs quattuor et vīgintī cum uxōre et liberīs suis fūgit. Ita Rōmae rēgnātum est 15 per septem rēgēs annīs ducentīs quadrāgintā tribus, cum adhūc Rōma, ubi plūrimum, vix usque ad quīntum decimum miliārium possidēret.

Beginning of the Republic

Hinc cōsulēs coepēre, prō ūnō rēge duo, hāc causā creātī, ut, sī ūnus malus esse voluisset, alter eum habēns 20 potestātem similem coercēret. Et placuit nē imperium longius quam annum habērent, nē per diūturnitātem potestātis insolentiōrēs redderentur, sed cīvilēs semper essent, quī sē post annum scīrent futūrōs esse privātōs. Fuērunt igitur annō primō ab expulsīs rēgibus cōsulēs L. Iūnius 25 Brūtus, quī maximē ēgerat ut Tarquinius pellerētur, et Tarquinius Collātīnus, marītus Lucrētiae. Sed Tarquiniō Collātīnō statim sublāta est dignitās. Placuerat enim, nē quisquam in urbe manēret, quī Tarquinius vocārētur. Ergō acceptō omnī patrimonīō suō ex urbe migrāvit et locō 30 ipsius factus est L. Valerius Pūblicola cōsul.

Wars of the Early Republic

Commōvit tamen bellum urbī Rōmae rēx Tarquinius, quī fuerat expulsus, et collēctis multis gentibus, ut in rēgnū posset restituī, dīmīcāvit. In primā pugnā Brūtus cōsul et Arrūns, Tarquinī filius in vicem sē occidērunt, 5 Rōmānī tamen ex eā pugnā victōrēs recessērunt. Brūtum mātṛōnae Rōmānae, dēfēnsōrem pudicitiae suae, quasi commūnem patrem per annum lūxērunt. Valerius Pūb-
licola Sp. Lucrētium Tricipitīnum collēgam sibi fēcit, Lucrētiaē patrem, quō morbō mortuō iterum Horātium
10 Pulvillum collēgam sibi sūmpsit. Ita primus annus quīn-
que cōsulēs habuit, cum Tarquinius Collātīnus propter nōmen urbe cessisset, Brūtus in proeliō perisset, Sp. Lucrētius morbō mortuus esset.

Secundō quoque annō iterum Tarquinius ut reciperētur
15 in rēgnū bellum Rōmānīs intulit, auxilium eī ferente Porsennā, Tusciae rēge, et Rōmam paene cēpit. Vērūm tum quoque victus est.

Tertiō annō post rēgēs exāctōs Tarquinius cum suscipī
nōn posset in rēgnū neque eī Porsenna, quī pācem cum
20 Rōmānīs fēcerať, praestāret auxilium, Tusculum sē con-
tulit, quae cīvitas nōn longē ab urbe est, atque ibi per
quattuordecim annōs privātus cum uxōre cōsensuit.

Quārtō annō post rēgēs exāctōs cum Sabīnī Rōmānīs bellum intulissent, victi sunt, et dē hīs triumphātum est.

Death of Brutus. The Dictatorship

25 Quīntō annō L. Valerius ille, Brūtī collēga et quater
cōsul, fātālīter mortuus est, adeō pauper, ut collātīs ā
populō nummīs sūmptum habuerit sepultūrae. Quem
mātṛōnae sicutī Brūtum annum lūxērunt.

Nōnō annō post rēgēs exāctōs cum gener Tarquinī ad
30 iniūriam socerī vindicandam īngentem collēgisset exer-
citum, nova Rōmae dignitās est creāta, quae dictātūra
appellātur, maior quam cōsulātus. Eōdem annō etiam

magister equitum factus est, quī dictātōrī obsequerētur. Dictātōr autem Rōmae primus fuit T. Larcus, magister equitum primus Sp. Cassius.

The Establishment of the Tribunate

Sextō decimō annō post rēgēs exāctōs sēditionem populus Rōmae fēcit, tamquam ā senātū atque cōsulibus premerētur. Tum et ipse sibi tribūnōs plēbis quasi propriōs iūdicēs et dēfēnsōrēs creāvit, per quōs contrā senātum et cōsulēs tūtus esse posset.

War with the Volscians

Sequentī annō Volscī contrā Rōmānōs bellum reparāvērunt, et victī aciē etiam Coriolōs civitātem, quam habebant optimam, perdidērunt.

Octāvō decimō annō postquam rēgēs ēiectī erant, expulsus ex urbe Q. Mārcius, dux Rōmānus, quī Coriolōs cēperat, Volscōrum civitātem, ad ipsōs Volscōs contendit irātus et auxilia contrā Rōmānōs accēpit. Rōmānōs saepe viciit, usque ad quīntum miliārium urbis accessit, oppugnātūrus etiam patriam suam, lēgātīs, quī pācem petēbant, repudiātīs, nisi ad eum māter Veturia et uxor Volumnia ex urbe vēnissent, quārum flētū et dēprecātiōne superātus remōvit exercitum. Atque hic secundus post Tarquīnium fuit, quī dux contrā patriam suam esset.

The Fabii and the War with Veii

C. Fabiō et L. Virgīniō cōsulibus trecentī nōbilēs hominēs, quī ex Fabiā familiā erant, contrā Vēientēs bellum sōli suscēpērunt, prōmittentēs senātui et populo per sē omne certāmen implendum. Itaque profectī, omnēs nōbilēs et quī singulī magnōrum exercituum ducēs esse dēberent, in proeliō concidērunt. Ūnus omnīnō superfuit ex tantā familiā, quī propter aetātem puerilem dūcī nōn potuerat ad pugnam. Post haec cēnsus in urbe

habitus est et inventa sunt cīvium capita cxvii milia CCCXIX.

Cincinnatus Made Dictator

Sequenti tamen annō cum in Algidō monte ab urbe duodecimō fermē miliārīō Rōmānus obsidērētur exercitus, L. 5 Quīntius Cincinnātus dictātor est factus, quī agrum quatuor iugerum possidēns manibus suis colēbat. Is cum in opere et arāns esset inventus, sūdōre dētersō togam prae-textam accēpit et caesis hostibus liberāvit exercitum.

Wars with Fidenae and Veii

Annō trecentēsīmō et quīntō decimō ab urbe conditā 10 Fidēnātēs contrā Rōmānōs rebellāverunt. Auxilium hīs praestābant Vēientēs et rēx Vēientium Tolumnius. Quae ambae cīvitātēs tam vicīnae urbī sunt, ut Fidēnae sextō, Vēi octāvō decimō miliārīō absint. Coniūnxērunt sē hīs et Volscī. Sed Mam. Aemiliō dictātōre et L. Quīntiō Cin- 15 cinnātō magistrō equitum victi etiam rēgem perdidērunt. Fidēnae captae et excisae.

Post vīgintī deinde annōs Vēientānī rebellāverunt. Dictātor contrā ipsōs missus est Fūrius Camillus, quī primum eōs vicit aciē, mox etiam cīvitātem diū obsidēns cēpit, 20 antiquissimam Italiae atque dītissimam. Post eam cēpit et Faliscōs, nōn minus nōbilem cīvitātem. Sed commōta est eī invidia, quasi praedam male divīsisset, damnātusque ob eam causam et expulsus cīvitāte.

Capture of Rome by the Gauls

Statim Gallī Senonēs ad urbem vēnērunt et victōs Rōmā- 25 nōs undecimō miliārīō ā Rōmā apud flūmen Alliam secūtī etiam urbem occupāverunt. Neque dēfendī quicquam nisi Capitōlium potuit; quod cum diū obsēdissent et iam Rōmānī famē labōrārent, acceptō aurō, nē Capitōlium obsidērent, recessērunt. Sed ā Camillō, quī in vicinā cīvitāte

exulābat, Gallis superventum est gravissimēque victi sunt. Postea tamen etiam secutus eos Camillus ita cecidit, ut et aurum, quod his datum fuerat, et omnia, quae cēperant, militaria signa revocāret. Ita tertiō triumphāns urbem ingressus est et appellātus secundus Rōmulus, quasi et ipse patriae conditor. 5

BOOK SIX

(Chapters 17-25)

Caesar's Wars in Gaul

Annō urbis conditae sexcentēsimo nōnāgēsimo tertiō C. Iūlius Caesar, quī postea imperāvit, cum L. Bibulō cōsul est factus. Dēcrēta est ei Gallia et Illyricum cum legiōnibus decem. Is primus vicit Helvētiōs, quī nunc Sēquanī appellantur, deinde vincendō per bella gravissima usque ad Oceanum Britannicum prōcessit. Domuit autem annis novem ferē omnem Galliam, quae inter Alpēs, flūmen Rhodanum, Rhēnum et Oceanum est et circuitū patet ad bis et triciēs centēna milia passuum. Britannīs mox bellum intulit, quibus ante eum nē nōmen quidem Rōmānōrum cognitum erat, eosque victōs obsidibus acceptis stipendiāriōs fēcit. Galliae autem tribūtī nōmine annuum imperāvit stipendium quadringentiēs, Germānosque trāns Rhēnum adgressus inmānissimis proeliis vicit. Inter tot successūs ter male pugnāvit, apud Arvernōs semel praesēns et absēns in Germāniā bis. Nam lēgātī eius duo, Titūrius et Aurunculēius, per insidiās caesi sunt. 15

Defeat of Crassus by the Parthians

Circā eadem tempora, annō urbis conditae sexcentēsimo nōnāgēsimo septimō, M. Licinius Crassus, collēga Cn. Pompei Magni in cōsulātū secundō, contrā Parthōs missus est et cum circā Carrās contrā omen et auspicia dimicāasset, ā 25

Surēnā, Orōdis rēgis duce, victus ad postrēmum interfectus est cum filiō, clārissimō et praestantissimō iuvene. Reliquiae exercitūs per C. Cassium quaestōrem servātae sunt, quī singulārī animō perditās rēs tantā virtūte restituit, ut
 5 Persās rediēns trāns Euphrāten crēbris proeliis vinceret.

Beginning of the Civil War

Hinc iam bellum cīvile successit exsecrandum et lacrimābile, quō praeter calamitatēs, quae in proeliis accidērunt, etiam populī Rōmānī fortūna mūtāta est. Caesar enim rediēns ex Galliā victor coepit poscere alterum cōsulātum
 10 atque ita, ut sine dubietāte aliquā eī dēferrētur. Contrādictum est ā Mārcellō cōsule, ā Bibulō, ā Pompēiō, ā Catōne, iussusque dīmissis exercitibus ad urbem redire. Propter quam iniūriam ab Ariminō, ubi mīlitēs congregātōs habēbat, adversum patriam cum exercitū vēnit. Cōn-
 15 sulēs cum Pompēiō senātusque omnis atque ūniversa nōbilitās ex urbe fūgit et in Graeciam trānsiit. Apud Ēpirum, Macedoniam, Achāiam Pompēiō duce senātus contrā Caesarem bellum parāvit.

The War in Spain and Greece

Caesar vacuum urbem ingressus dictātōrem sē fēcit. Inde
 20 Hispāniās petiit. Ibi Pompēi exercitūs validissimōs et fortissimōs cum tribus ducibus, L. Āfrāniō, M. Petrēiō, M. Varrōne, superāvit. Inde regressus in Graeciam trānsiit, adversum Pompēium dimicāvit. Primō proeliō victus est et fugātus, ēvāsīt tamen, quia nocte interveniente Pom-
 25 pēius sequī nōluit, dixitque Caesar nec Pompēium scire vincere et illō tantum diē sē potuisse superārī. Deinde in Thessaliā apud Palaeopharsālum prōductis utrimque ingentibus cōpiis dimicāvērunt. Pompēi aciēs habuit XL milia peditum, equitēs in sinistrō cornū sexcentōs, in dextrō
 30 quīngentōs, praetereā tōtius Orientis auxilia, tōtam nōbilitātem, innumerōs senātōrēs, praetōriōs, cōsulārēs et quī

magnōrum iam bellōrum victōrēs fuissent. Caesar in aciē suā habuit peditum nōn integra xxx milia, equitēs mille.

Pompey's Defeat and Death

Numquam adhūc Rōmānae cōpiae in ūnum neque maiōres neque meliōribus ducibus convēnerant, tōtum terrārum orbem facile subāctūrae, sī contrā barbarōs dūcerentur. Pugnātum tum est ingentī contentiōne, victusque ad postrēmum Pompēius et castra eius direpta sunt. Ipse fugātus Alexandriam petiit, ut ā rēge Aegyptī, cui tūtor ā senātū datus fuerat propter iuvenilem eius aetātem, acciperet auxilia. Quī fortūnam magis quam amīcitiam secūtus 10 occīdit Pompēium, caput eius et ānulum Caesarī mīsīt. Quō cōspectō Caesar etiam lacrimās fūdisse dicitur, tantī virī intuēns caput et generī quondam suī.

Caesar in Egypt and Asia Minor

Mox Caesar Alexandriam vēnit. Ipsī quoque Ptolemaeus parāre voluit insidiās, quā causā bellum rēgī inlātum 15 est. Victus in Nilō periit inventumque est eius corpus cum lōricā aureā. Caesar Alexandriā potītus rēgnum Cleopatrae dedit, Ptolemaei sorōrī. Rediēns inde Caesar Pharnacēn, Mithridātis Magnī filium, quī Pompēiō in auxilium apud Thessaliam fuerat, rebellantem in Pontō et multās populī Rōmānī prōvinciās occupantem vicit aciē, postea ad mortem coēgit. 20

Renewal of the War in Africa

Inde Rōmam regressus tertiō sē cōsulem fēcīt cum M. Aemiliō Lepidō, quī eī magister equitum dictātōrī ante annum fuerat. Inde in Āfricam profectus est, ubi infinīta 25 nōbilitās cum Iubā, Mauritāniae rēge, bellum reparāverat. Ducēs autem Rōmānī erant P. Cornēlius Scīpiō ex genere antīquissimō Scīpiōnis Āfricānī (hic etiam socer Pompēi Magnī fuerat), M. Petrēius, Q. Vārus, M. Porcius Catō,

L. Cornēlius Faustus, Sullae dictātōris filius. Contrā hōs commissō proeliō post multās dīmiciōnēs victor fuit Caesar. Catō, Scīpiō, Petrēius, Iuba ipsī sē occidērunt. Faustus, Sullae quondam dictātōris filius, Pompēi gener, ā
 5 Caesare interfectus est.

End of the Civil War

Post annum Caesar Rōmam regressus quārtō sē cōn-
 sulem fēcit et statim ad Hispāniās est profectus, ubi Pom-
 pēi filiī, Cn. Pompēius et Sex. Pompēius, ingēns bellum
 praeparāverant. Multa proelia fuērunt, ultimum apud
 10 Mundam cīvitātem, in quō adeō Caesar paene victus est,
 ut fugientibus suis sē voluerit occidere, nē post tantam
 rei militāris glōriam in potestātem adulēscentium nātus
 annōs sex et quīnquāgintā venīret. Dēnique revocātis suis
 vicit. Ex Pompēi filiis maior occīsus est, minor fūgit.

Caesar the Ruler of Rome. His Death

15 Inde Caesar bellis cīvilibus tōtō orbe compositis Rōmam
 rediit. Agere insolentius coepit et contrā cōnsuētūdinem
 Rōmānae libertātis. Cum ergō et honōrēs ex suā voluntāte
 praestāret, quī ā populō anteā dēferēbantur, nec senātui ad
 sē venientī adsurgeret aliaque rēgia ac paene tyrannica
 20 faceret, coniūrātum est in eum ā sexāgintā vel amplius
 senātōribus equitibusque Rōmānis. Praecipuī fuērunt
 inter coniūrātōs duo Brūtī ex eō genere Brūtī, quī primus
 Rōmae cōnsul fuerat et rēgēs expulerat, et C. Cassius et
 Servilius Casca. Ergō Caesar, cum senātus diē inter
 25 cēterōs vēnisset ad cūriam, tribus et vīgintī vulneribus
 cōnfossus est.

NOTES

Eutropius was a Roman historian who wrote in the latter part of the fourth century A. D. His book, which was called *Breviarium ab Urbe Condita*, was a brief history of Rome from the founding of the city to the year 364 A. D.

THE FORMATION OF LATIN WORDS

(1) Many Latin words are formed from other words by the use of endings which have special meanings. The meaning and use of some of the endings which are thus employed are as follows:

(2) Nouns formed by adding **-tor** (occasionally **-sor**) to the participial stem indicate the person who does the act expressed by the verb from which they are derived:

victor, a conqueror, from **vincō**.

a. Such nouns may be formed from **moneō**, **capīō**, **dūcō**, **audiō**, and many other verbs.

b. These nouns in **-tor** and **-sor** are masculine. There is a corresponding feminine form, ending in **-trix**: **victrix**, **adiutrix**, **administratrix**.

c. Many of these words have been taken into the English language without change of form, but sometimes the meaning has been changed from that of the Latin word; **doctor**, from **doceō**, originally meant *one who teaches*, then *a learned man* in any special form of knowledge.

(3) Names of qualities (abstract nouns) are formed from adjective stems with the endings **-tās** and **-tūdō**, and from adjective or noun stems with the ending **-tūs**. These nouns are all feminine:

libertās, freedom, from **liber**.

magnitūdō, greatness, from **magnus**.

virtūs, manliness, courage, from **vir**.

a. Nouns with the ending **-tās** may be formed from **gravis**, *heavy*, **levis**, *light*, **nōbilis**, *well-known*, *noble*. Some of these words came to be used as collective nouns, indicating a group of persons possessing the quality named: **nōbilitās**, originally *celebrity*, came to mean *the prominent persons* of a state.

b. The English derivatives of these words end in **-ty**: *liberty*, *nobility*.

c. Nouns with the ending **-tūdō** may be formed from **lātus**, *broad*, **altus**, *high*, **fortis**, *brave*. The English derivatives from this group end in **-tude**: *magnitude*, *fortitude*.

d. Other nouns formed like **virtūs** are **servitūs**, *slavery*, from **servus**; **senectūs**, *old age*, from **senex** (*old*).

(4) Nouns formed with the ending **-lus** (**-ulus**, **-ellus**, **-illus**) are diminutives; that is, they indicate a small object. The ending is really an adjective ending, but most of the words thus derived have come to be used as nouns:

filiolus, a little son, from **filius**.

rēgulus, a petty king, from **rēx** (stem **rēg-**).

a. Nouns ending in **-r** change the final **r** to **l** when **-lus** is added:
libellus, a little book, from **liber**; **agellus**, a little field, from **ager**.

(5) Adjectives ending in **-ōsus** are formed from nouns, and mean *full of* or *abounding in* that which is named by the nouns from which they are derived:

periculōsus, full of danger, dangerous, from **periculum**.

annōsus, full of years, aged, from **annus**.

a. An adjective meaning *abounding in space* may be derived from **spatium**.

(6) There are also certain syllables used as prefixes with special meanings.

a. The syllable **re-** or **red-** (**red-** always before vowels and **h**) means *back* or *again*:

redire, to come back.

rescribere, to write in reply.

b. Sometimes the prefix seems to have lost its force, leaving no appreciable difference between the simple verb and the derivative:
manēre, **remanēre**.

(7) The syllable **in-** prefixed to adjectives means *not*:

iniūstus, not just.

indignus, not worthy.

a. In English derivatives from these words the prefix usually becomes **un-**: *unjust*, *uncommon*. But sometimes it keeps its original form: *incapable*, *incorrect*.

b. The Latin preposition **in**, meaning *in*, *on*, or *against*, which is used to form compound verbs, is a different word.

(8) The syllable **per-** used with adjectives and adverbs means *very*:

perfacilis, very easy.

permulti, very many.

a. **per** when used with verbs means *through* or else serves to emphasize the meaning of the verb:

perrumpere, to break through.

perfrui, to enjoy thoroughly.

(9) The syllable **dis-** or **di-** used with verbs means *apart*:

discēdere, to go apart.

distinēre, to hold apart.

(10) Most prepositions are used as prefixes to form compound verbs, usually with their original meaning. Sometimes, however, they serve merely to emphasize. The preposition **cum** appears in composition as **com-** or **con-**: **comportāre**, to carry together, collect; **concurrere**, to run together.

REVIEW OF SYNTAX

AGREEMENT

37. 1. Adjectives and participles agree in gender, number, and case with the nouns to which they belong (55).

2. A relative pronoun agrees with its antecedent in gender and number, but its case depends on its use in its own clause (288).

3. A noun in apposition agrees in case with the noun which it explains (62).

4. A verb agrees with its subject in person and number (44).

CASES

THE NOMINATIVE

38. 1. The subject of a finite verb is in the nominative case (11).

2. A predicate noun used with a finite form of *sum* is in the nominative case (50, 2).

THE GENITIVE

39. 1. The genitive is used to denote a person or thing referred to as possessing something (11).

2. The genitive is used to refer to the whole of something, of which a part is denoted by the word on which the genitive depends (265).

3. The genitive, modified by an adjective, may be used to describe a person or thing (352).

4. Nouns and adjectives which denote actions sometimes take a dependent genitive in a relation similar to that of a direct object to the verb on which it depends (381).

5. The genitive may be used to denote the material of which something is composed, or the persons or objects making up a collective noun (521).

6. The verbs *memini* and *reminiscor*, *remember*, and *obliscor*, *forget*, frequently take a genitive as object. But if the object is a neuter pronoun or adjective it always stands in the accusative (543).

THE DATIVE

40. 1. The indirect object is in the dative (26).

2. The dative is used in dependence on adjectives of *attitude*, *quality*, or *relation* to indicate the person or thing toward which the attitude is directed or in reference to which the quality or relation is said to exist (27).

3. Verbs meaning to *favor*, *please*, *trust*, *obey*, *serve*, *resist*, *envy*, *threaten*, *pardon*, *spare*, and *persuade*, take their (apparent) objects in the dative (125).

4. The possessor of something may be denoted by the dative with the thing possessed in the nominative as the subject of a form of the verb meaning *to be* (325).

5. The purpose or end which something serves or is intended to serve is often expressed by the dative (196).

6. With many verbs compounded with *ante*, *ob*, *prae*, or *sub*, a noun or pronoun connected in sense with the preposition is put in the dative. The dative is also thus used with compounds of *ad* and *in* when motion is not expressed, and occasionally with the compounds of a few other prepositions (324).

7. The dative is often used to indicate a person who is likely to be affected favorably or unfavorably by an act or situation, or with reference to whom an act is said to be done or a situation to exist. Occasionally this use of the dative is found with words referring to things (245).

8. With the future passive participle the dative is used to indicate the person by whom the act must be done or ought to be done (538).

THE ACCUSATIVE

41. 1. The direct object of a verb is in the accusative (11).

2. A noun used to tell how long an act or situation continues is put in the accusative (177).

3. A noun used to express extent in space is put in the accusative (312).

4. With the names of towns and small islands, also with *domus*, the accusative without a preposition is used to name the place to which motion is directed. With other words in this construction a preposition, *ad* or *in*, is used (313).

THE ABLATIVE

42. 1. The ablative represents a combination of ideas, the original force of which is expressed by English phrases with the prepositions *from*, *in*, or *with* (83).

2. Verbs meaning *to separate*, *remove*, *deprive of*, *lack*, *be absent*, and the like, take the ablative of separation, often with *ab* or *ex* (329).

3. With names of towns and small islands, also with *domus*, the ablative without a preposition is used to express the idea of place from which. With other words in this construction, a preposition, *ab*, *dē*, or *ex*, is used (330).

4. With passive verbs, the noun or pronoun which indicates the person by whom the act is done is put in the ablative with *ā* or *ab* (98).

5. With the comparative form of an adjective (occasionally of an

adverb), if **quam** is omitted, the noun or pronoun indicating the person or thing with which comparison is made is put in the ablative without a preposition (340).

6. The ablative with **in** is used to indicate the place where something is or where some act occurs (110).

7. The ablative without a preposition is used to indicate the time at which or within which an act occurs or a situation exists (211).

8. The ablative with the preposition **cum** is used to indicate the person with whom one is associated in doing an act (104).

9. The manner in which an act is done may be expressed by the ablative with **cum**. But **cum** may be omitted if the noun is modified by an adjective (277).

10. The means or instrument with which an act is done is expressed by the ablative without a preposition (130).

11. The way or route by which one goes may be expressed by the ablative without a preposition (318).

12. The ablative without a preposition is used to express the degree or measure of difference between two things (346).

13. A noun or pronoun in the ablative, together with an adjective, a participle, or another noun in agreement, may be used to indicate some circumstance or event loosely connected with the rest of the sentence (370).

14. The ablative without a preposition may be used to indicate in what respect a statement is true (366).

15. The ablative modified by an adjective may be used to describe a person or thing (353).

16. The ablative with or without a preposition may be used to express cause (449).

17. The deponents **ŭtor**, **fruor**, **fungor**, **potior**, and **vĕscor** take their objects in the ablative (419).

THE VOCATIVE

43. The vocative is used to denote the person addressed (34).

THE LOCATIVE

44. With the names of towns and small islands, also with **domus**, the place where some act occurs or something exists is denoted by the locative (299).

a. The locative has the same form as the genitive in the singular of nouns of the first and second declension; elsewhere it has the same form as the ablative. The locative of **domus** is **domi**.

MOODS

THE INDICATIVE

45. The indicative is used in statements of fact and in questions which imply that the answer expected is a statement of fact.

THE SUBJUNCTIVE

46. 1. The most important use of the subjunctive is to refer to an act as desired (456).

2. In a main clause the expression of desire may consist: (1) in urging someone to act with the speaker (456, a), (2) in giving an order to be carried out by someone else than the person addressed (456, b).

3. A subordinate clause expressing the purpose of the main act has its verb in the subjunctive. Purpose clauses are introduced by *ut* or *nē*, or a relative pronoun (460).

4. A substantive clause depending on a verb which expresses or implies desire has its verb in the subjunctive (470).

5. Verbs and other expressions of fear may take a dependent clause with the subjunctive introduced by *nē*, *that*, or *ut*, *that not* (531).

6. The subjunctive may be used in a subordinate clause to refer to an act as anticipated or expected (476).

7. The subjunctive is used in subordinate clauses expressing result (483).

8. A substantive clause depending on a verb or phrase which expresses the bringing about of an act or of a situation has its verb in the subjunctive (516).

9. A clause introduced by *cum* meaning *when*, if used to describe the situation in which the main act took place, has its verb in the past or past perfect subjunctive (511).

10. A *cum* clause introduced by *cum* meaning *since* has its verb in the subjunctive (520).

11. A clause introduced by *cum* meaning *although* has its verb in the subjunctive (526).

12. An indirect question has its verb in the subjunctive (489).

13. Sometimes a subordinate clause which would otherwise have its verb in the indicative takes the subjunctive because it is closely dependent on a subjunctive or an infinitive (587).

CONDITIONAL SENTENCES

47. 1. Non-committal conditional sentences have their verbs in the indicative (571).

2. Future less vivid conditional sentences have their verbs in the present or perfect subjunctive (581).

3. Conditional sentences **contrary to fact** have their verbs in the past subjunctive to refer to present time, and the past perfect to refer to past time (576).

THE IMPERATIVE

48. The imperative is used to express affirmative commands. The forms of the present tense are usually employed except in the case of the verbs *memini* and *sciō*, of which the future is used with present meaning (402, 586).

THE INFINITIVE

49. 1. The infinitive is sometimes used to complete the meaning of the finite verb of the clause in which it stands (272).

2. Words of *knowing, thinking, saying, hearing, and observing* may take as object an infinitive with its subject in the accusative (395).

INDIRECT DISCOURSE

50. In Latin, indirect quotations are expressed as follows: (a) A main clause containing a statement of fact has its verb in the infinitive with the subject in the accusative.

(b) A main clause expressing a command has its verb in the subjunctive.

(c) All subordinate clauses have their verbs in the subjunctive (499).

THE SUPINE

51. 1. The accusative of the supine is used to express purpose in clauses in which the finite verb expresses motion (547, a).

2. The ablative of the supine is used as an ablative of respect with a few adjectives (547, b).

THE GERUND

52. The gerund is a verbal noun, used only in four cases and in the singular number (552).

THE GERUNDIVE

53. The gerundive is a participle and is used in agreement with a noun or pronoun (557).

RELATION OF TENSES

54. The tense of a subjunctive in a dependent clause usually bears a certain relation to the tense of the verb in the main clause.

(a) If the main verb denotes present or future time, the dependent subjunctive is regularly present or perfect.

(b) If the main verb denotes past time the dependent subjunctive is regularly past or past perfect (510).
